Welcome to the SPEECH Community!

Why should you join the community?

Members receive free access to a single site offering the latest news, trends and developments in speech technology, as well as services including expert advice and tools for commercial speech applications.

What does the SPEECH Community offer you?

The SPEECH Community is the first knowledge network exclusively devoted to speech applications. Our goal is to provide decision-makers, designers and developers with a comprehensive range of services to promote and enhance best practices.

Our mission:

To be the catalyst in establishing a competence network for speech technology by ...

- providing a **COMMUNICATION PLATFORM** for the systematic exchange of information among experts
- organizing **KNOWLEDGE-TRANSFER** through case studies and whitepapers
- providing **REASONABLY-PRICED SOLUTIONS** for companies of all sizes
- offering a **RAPID, SIMPLE, and INEXPENSIVE** introduction to the development of speech applications
- promoting the use of **OPEN STANDARDS**

Who is behind the SPEECH Community?

Led by the publishers of the VOICE-Community.de, and supported by partner companies and market experts from the world of speech technology.

Background

An in-depth research conducted on the application and understanding of the speech technology market in 2004 concluded that the industry was in dire need of an information and knowledge hub. It would act as a conduit for the dissemination of information and the generation of ideas and concepts. The success of VOICE-Community.de has led to the inception of the SPEECH Community now meeting the demand for knowledge transfer and business development in the field of speech automation on a global level.
